Behaviours

En Aromas del Campo comenzamos nuestra andadura como sociedad en 1986, en Valencia. En aquel entonces nuestra especialidad era la fabricación de potpourris de flores secas y productos aromáticos. Unos años más tarde comenzamos a fabricar pequeños sobremesas de cristal rellenos de flores secas. Desde entonces, y una vez consolidados en el sector de la iluminación, trasladamos nuestra actividad a la población de Bétera (Valencia), desde donde centralizamos la producción y distribución internacional de nuestros productos de iluminación.

Apostamos por un diseño tecnológico, funcional y asequible, con líneas puras y sencillas pero sin descuidar la forma. En esta

colección ponemos el foco en materiales tradicionalmente relegados a los acabados constructivos y a los complementos de la decoración, como son el mármol, la madera o la cerámica. Sin embargo, nuestros materiales principales continúan siendo el metal y el cristal combinados en un juego de solidez y ligereza que resulta en piezas elegantes y atemporales.

Este año ofrecemos una visión más humana, más cercana e intimista, **Behaviours Around Light**, es un concepto que recrea las sensaciones y comportamientos alrededor de nuestras lámparas. Los ambientes, la luz, la atmósfera y las personas.

In Aromas del Campo we began our journey as a company in 1986, in Valencia. At that time our specialty was the manufacturing of potpourris of dried flowers and aromatic products. A few years later we started to make small glass table lamps filled with dried flowers. Since then, and once consolidated in the lighting sector, we moved our activity to the town of Bétera (Valencia), where we centralized production and international distribution of our lighting products.

We bet on technological design, functional and affordable lamps, with pure and simple lines but without neglecting the forms of Aromas. In this collection we focus on tradi-

tionally relegated materials to the construction finishes and decorative complements, such as marble, wood or ceramic. However, our main materials continue to be metal and glass, combined in a diversion of solidity and lightness that results in elegant and timeless pieces.

This year we wanted to offer a more human, closer and more intimate vision, **Behaviours Around Light**, is a concept that recreates the sensations and behaviors around our lamps. The environments, the light, the atmosphere and the people.

Protection against solids larger than 12mm and no protection from liquids

Información general

Las descripciones y medidas de los productos del presente catálogo son orientativas, pudiendo por tanto ser modificadas, a fin de mejorar las características técnicas o de diseño. La empresa se reserva el derecho de anular o modificar cualquier modelo sin previo aviso. Todos los modelos cumplen las normas exigidas por la CE para iluminación de uso doméstico y sus características vienen determinadas por las clase 1 y la clase 2. Los acabados y las especificaciones técnicas corresponden a los productos que se suministran en Europa, pudiendo estos variar en otros mercados. Para una buena conservación de las lámparas, no usar bombillas de potencia superior a las recomendadas y limpiar solamente con un paño seco. No usar limpiametales ya que dañan los barnices protectores que garantizan la duración del acabado.

General Information

The descriptions and dimensions of the items in this catalogue are indicative and may be modified for the purpose of technical or design improvements. We reserve the right to cancel or change all models without prior notice. All items meet the CE Class 1 and class 2 safety regulations for home lighting appliances. The finishings and technical specifications listed here are for the european market and may vary elsewhere. Do not use stronger bulbs that recommended, and always clean lamps with a soft dry cloth. Metal polish will damage the protective finishings.
